PREDICT • PREVENT • PROTECT

## March for Safety!

NAWIC Ft. Worth invites you to join us for this special event March 3rd from 2pm-4pm

### Two Hours That Could Save A Life

This is filled with information that came straight from the criminals' minds and mouths from years of interviews with these very same perpetrators now behind bars. These are the *\*REAL\** experts, so learn how they went about selecting, luring, and exploiting their victims vs. becoming one yourself.

#### First Hour: Situational Concerns

This is for "women on the go," your coming and going, business travel, happy hours, and similar social interactions. It is about helping you navigate questionable people and situations, with an emphasis on behaviors versus appearances, and using your ears as well as your eyes.

#### Second Hour: Physical Concerns

Margaret Meade once said, "No woman should rely on a man to protect her. She should learn how to protect herself." But what are the basics you need to know to *\*AVOID\** such confrontations and why should you avoid them at all costs? This second hour will be a wake-up call to that question.
